CANADIAN CATTLE IDENTIFICATION AGENCY

A little about CCIA

Firstly, we are not government. We are an industry-initiated, not-for-profit organization incorporated to establish a national livestock identification database known as the Canadian Livestock Tracking System (CLTS).

CLTS account holders are able to report important information to the database such as animal identification, premises identification and movement of the animal.

CCIA supports the efficient traceback and containment of serious animal health and food safety concerns, by working closely with government, primary producers and dealers, as well as other livestock organizations.

Our main responsibilities include:

- Maintaining the CLTS database
- ALL THINGS tags (animal indicators)
- Communicate regulation changes and news

The Canadian Cattle Identification Agency (CCIA), your goat industry traceability partner, has been selected as the responsible administrator for goats in every province.

In preparation for the proposed federal regulations, CCIA is offering pre-approved tags (indicators) to goat producers exclusively through our webstore at tags.canadaid.ca

Why new traceability regulations?

What we mean by Traceability

Traceability is the ability to follow an item or a group of items – be it animal, plant, food products or ingredient – from one point in the supply chain to another, either backwards or forwards.

Traceability systems are used for many things, including the protection of animal health, and food safety. They can help reduce response time, thereby limiting economic, environmental and social impacts of emergency situations such as disease outbreaks and environmental disasters such as floods, fires and pipeline bursts.

Now that we understand why Traceability is important... let's talk regulations:

The main reasons for federal regulatory changes are to increase Canada's ability in responding to health threats and other emergencies and improve traceability nationally. CFIA is proposing amendments to the *Part XV of the Federal Health of*

Animals Regulations that are expected in 2020.

Proposed regulations will likely affect ALL producers.

Current regulations focus on Animal Identification; all cattle/sheep/bison must be tagged with an approved tag/indicator prior to moving from their current location or leaving their farm of origin. The proposed regulations are expected to include goats to be individually identified as well. Also under the proposed regulations, when ruminants, including goats, are moved from a departure site to a destination site, the operator of the destination site would be required to report the individual animal ID's, the premises identification number (PID) of the departure site and the date and time at which the animals were loaded and the vehicle's information at the departure site. The main objective for information accompanying animals is to support the operator of the destination site being compliant with this requirement.

For more information, visit canadaid.ca or contact us at: 1-877-909-2333 info@canadaid.ca

Calgary, AB T2E 8X4

What is the difference between CFIA and CCIA?

To put it simply, the Canadian Food Inspection Agency (CFIA) creates and enforces all national livestock regulations and acts as the governing body.

The Canadian Cattle Identification Agency (CCIA) is a CFIA appointed Responsible Administrator and is here to support industry by managing the CLTS database and providing tools and information for data capture.

A CLTS database account ID is required to purchase approved tags (indicators).

If you have purchased approved tags for beef, dairy, bison, sheep, goats or cervids, then you will already have a CLTS database account.

The CLTS is a national database that was created to capture traceability data in Canada such as animal identification, premises identification and animal movement data.

CCIA is here to support you with resources and tools to help you get familiar with the CLTS database and the MOBO APP found at <http://support.canadaid.ca/>

To create a CLTS database account and a username and password contact

CCIA Client Support at 1-877-909-2333

or complete a New Account Request Form:
<https://www.canadaid.ca/clts/clts-forms/>

Return the completed form to CCIA by:

- a) Email: info@canadaid.ca
- b) Fax: 403-275-1668

Put the CLTS Database

...in your hand!

On the move, made EASY

Download FREE from your APP store and install
 Enter your CLTS login and password

CLTS MOBO is now more user-friendly than ever with streamlined features and intuitive design.

TRACEABILITY RESOURCE
 CANADIAN CATTLE IDENTIFICATION AGENCY

ENTER EVENTS
 Submit birthdates, animal movement and retired events (to name a few), directly to the CLTS database.

BLUETOOTH ENABLED
 Pair your tag reader to your mobile device. Scanned tag numbers are uploaded straight to the CLTS MOBO APP*. **Bluetooth feature for Android ONLY*

VOICE INPUT OPTION
 Simply read the Tag ID aloud and select, rather than manually entering.

BARCODE SCANNING
 Save time by scanning barcodes instead of manually entering tag numbers.

OPTICAL CHARACTER RECOGNITION
 OCR technology converts images of number lists into editable, searchable data, which makes for easy uploads to your CLTS account.

OFFLINE MODE
 Allows users to input data and upload when it makes sense; when the job is finished or when back in a service area.

SCREENSHOT FEEDBACK
 Include a screenshot for easy feedback.

The CLTS MOBO APP is your best tool for accessing the Canadian Livestock Tracking System at your convenience.

For more information or help with the CLTS MOBO APP contact us at:

Tag purchasing made easy — your one-stop, digital shop!

The CCIA Tag and Tag Accessories catalogue is online and contains images and descriptions of all products offered for sale through the CCIA webstore.

<https://www.canadaid.ca/wp-content/uploads/2019/07/Tag-and-Tag-Accessories-Catalogue-July-2019.pdf>

How do I activate my CCIA webstore account?

1. If you have bought tags you have a CLTS account and can access the webstore.
2. Go to **tags.canadaid.ca** and click the **CCIA Producer Place an Order**
3. Below Login click on **Register - Create your Access Codes** then click on **Activate your tag order account**
4. Put in your CLTS Account and the phone number you provided when you set up your CLTS Account.
5. View all the approved tags and other products available as well as goat tags (indicators), that are only available online.

How to prepare for proposed regulations

STEP 1 OBTAIN A PID

Why? Premises Identification is a way of linking livestock to land locations. It is the first necessary step in traceability. Having a premises ID number for your operation allows for traceability information to be accessed quickly for the protection of animal health, public health and market access for your industry. A PID will be required once the proposed amendments take place.

How? By contacting your provincial government, listed here.

STEP 2 Contact CCIA and update your CLTS account with your PID number

Why? Your provincial government may not automatically share this information with us. It is your responsibility to share your PID with CCIA and make sure your CLTS account is up to date to avoid reporting issues.

How? By calling 1-877-909-2333, emailing info@canadaid.ca or entering it yourself in your CLTS account.

STEP 3 Get familiar with your CLTS account and the CLTS MOBO APP

Becoming comfortable with these tools will reduce the workload required when the proposed

amendments move forward.

Changes to federal regulations will impact Movement Reporting, which would require animals to travel with movement information. It will also require, in most cases, the destination site to be responsible for reporting the arrival of animals.

For more information on the proposed regulatory amendments, take a look at Canadian Food Inspection Agency's TRACE newsletters, which can be found on CCIA's website at <https://www.canadaid.ca/traceability/newsletters/>
